What is Edit Mode?

The **Edit Mode** toggle allows a user to change the way they are viewing the content on screen. Turn on the Edit Mode switch; this will enable many navigation and editing tools. The Edit Mode switch is located in the upper-right corner of every page and must be “On” in order to access the editing tools. The switch image indicates the current mode for the page:

- **Edit = Off** means the page is displaying what the students will see
- **Edit = On** means that the editing tools are visible for the instructor

**Note:** The Edit Mode toggle will only appear to those users who have permission to use it. If you look closely at the course menu, the Assignment button is listed there; however, it will not be visible while Edit Mode is OFF. If there is no content for the Assignment button, it is not visible to the students in the course.
