

Importing the World into Minecraft

Minecraft: Java Edition

1. Download the VWCC.zip file.
2. Extract VWCC.zip (In Windows, right click and select "Extract All"). This creates a folder called "VWCC".
3. Move the "VWCC" folder to your Minecraft saves folder. This varies depending on which Operating System you have.
 - I. Windows
 - a. Hit Win + R, type %appdata%\.minecraft\saves and then click OK
 - II. Linux
 - a. The path is: ~/.minecraft/saves
 - III. OS X
 - a. Open Finder then paste: ~/Library/Application Support/minecraft/saves in the Search box.
4. Open Minecraft, and it should appear in your single player worlds.

Minecraft: Bedrock Edition (Windows 10)

1. Download the VWCC.mcworld file.
2. Open Minecraft
3. Navigate to the Worlds tab and click the Import button next to the Create New World button.
4. Navigate to where you downloaded VWCC.mcworld, and open it.
